## Objective

As a backend engineer with four years of professional experience, I seek a role that uses & expands my abilities to comprehend, code, & design production systems at scale, to deliver tangible outcomes & improvements.

## Summary of Skills

- Backend Technologies (Perl, Python, Java, Mojolicious)
- Frontend Technologies (HTML, JavaScript, CSS, Ember.js, Materialize)
- Linux (RedHat, SUSE, Debian, & derivatives)
- Databases (MySQL, MariaDB, PostgreSQL, Oracle, Redis)
- Cloud Infrastructure (Terraform, Kubernetes)
- Queues (RabbitMQ, Amazon SQS, Celery)
- Security (Network, OS, AppSec, OpSec)
- Version Control (Git)
- Testing (Unit testing, Functional testing)

## Professional Experience
